## **AMENDMENTS TO THE CLAIMS**

- 1-19. (Cancelled)
- 20. (Currently Amended) A <u>stain-resistant</u>, <u>acid-dyed nylon</u> filament having a core and a sheath which surrounds entirely said core <u>and is present in an amount of less than about 10 wt.% of the filament</u>, wherein said core is formed of a <u>nylon</u> core polymer <u>having an amine end group</u> (AEG) <u>content of between about 10 meg/kg</u> which is susceptible to dyeing by an <u>acid</u> dye bath chemical, and <u>wherein</u> said sheath is formed of a <u>nylon</u> sheath polymer which is resistant to dyeing by said <u>acid</u> dye bath chemical, and wherein said filament is dyed such that said <u>acid</u> dye bath chemical physically diffuses or migrates through said <u>nylon</u> sheath polymer to cause the <u>nylon</u> core polymer to be dyed a color of the <u>acid</u> dye bath chemical, while the sheath polymer is substantially undyed thereby.
  - 21. (Original) The filament of claim 20, which is a trilobal filament
  - 22. (Canceled)
- 23. (Currently Amended) The filament of claim 22 claim 20, which has between about 90 wt.% to about 97 wt.% of the core polymer, and between about 3 wt.% to about 10 wt.% of the sheath polymer.
  - 24. (Canceled)
- 25. (Currently Amended) The filament of claim 24 claim 20, wherein the nylon sheath polymer has an AEG content of less than about 5 meq/kg.
- 26. (Original) The filament of claim 25, wherein the nylon sheath polymer is a nylon-6,12 homopolymer.
- 27. (Currently Amended) The filament of claim 20 <u>or 26</u>, wherein the <u>nylon</u> core is a nylon polymer which is at least one <u>nylon</u> selected from the group consisting of nylon-6, nylon-12, nylon-11, nylon-6/6, nylon-6/10 and copolymers and blends thereof.
